# Pay It Forward!

The world is a collection of things that have successfully propagated. In this project, help students make kindness the thing that lives on in your school, your community, and your world. Students learn about epidemiology in a hands-on way as they track the virality of random acts of kindness.

At the conclusion of the project, students present to your school and community a geographic visualization of the ways in which the acts of goodness that they precipitated have rippled out into the broader world.
